### **TRANSFORMIX ENGINEERING EXPANDS MANUFACTURING OPERATION TO GARDINERS ROAD FACILITY**

Kingston, ON - Transformix Engineering Inc. is pleased to announce that its CNC Assembly™ Technology is gaining tremendous traction in its US and European markets. As a result, the company is consolidating and expanding its manufacturing to its Plant 2 location at 1150 Gardiners Road in Kingston.

CNC Assembly™ is an exclusive automated assembly technology that combines the high rates of continuous motion with the flexibility of robotics. CNC Assembly™ machines can be quickly modified, retooled and reconfigured to run new products at high rates resulting in more economical, simplified and easier to maintain assembly lines.

Since 1995, Transformix Engineering has been a premier supplier of innovative factory automation systems and contract manufacturing services, serving an international clientele of manufacturing firms.

The Transformix Engineering building located at 70 Railway Street in Kingston will be sold or leased as the company fully consolidates its manufacturing facility to 1150 Gardiners Road, Kingston. All current head office activities will remain at 70 Railway Street until the building has been sold or leased.
